2023 Fall

## Learn **Essential Concepts** of **Programming Languages**

- Why?
  - To **learn new programming languages** quickly.
  - To **evaluate** and pick the best language for a given task.
  - To design a **specialized language** for a specific task.
- How?

### By Implementing **Interpreters** using **Scala**

- You will learn how to define **syntax** and **semantics** of target languages.
- You will implement **interpreters** of the target languages.
- You will use **Scala** as an implementation language.
