

Lecture 0 – Course Overview

COSE215: Theory of Computation

Jihyeok Park

2024 Spring

- **Instructor:** Jihyeok Park (박지혁)
 - **Position:** Assistant Professor in CS, Korea University
 - **Expertise:** Programming Languages, Software Analysis
 - **Office hours:** 14:00–16:00, Tuesdays (appointment by e-mail)
 - **Office:** 609A, Science Library Bldg
 - **Email:** jihyeok_park@korea.ac.kr

- **Instructor:** Jihyeok Park (박지혁)
 - **Position:** Assistant Professor in CS, Korea University
 - **Expertise:** Programming Languages, Software Analysis
 - **Office hours:** 14:00–16:00, Tuesdays (appointment by e-mail)
 - **Office:** 609A, Science Library Bldg
 - **Email:** jihyeok_park@korea.ac.kr

- **Class:** COSE215 - 01 (English)

- **Instructor:** Jihyeok Park (박지혁)

Week	Contents
1	Basic Concepts
2	Deterministic Finite Automata (DFA)
3	Nondeterministic Finite Automata (NFA)
4	Regular Expressions and Languages
5	Properties of Regular Languages
6	Context-Free Grammars and Languages
7	Parse Trees and Ambiguity
8	Midterm Exam (Apr. 24 - Wed.)
9	Pushdown Automata
10	Deterministic Pushdown Automata
11	Properties of Context-Free Languages
12	Turing Machines (TMs)
13	Extensions of Turing Machines
14	Undecidability
15	P, NP, and NP-Completeness
16	Final Exam (Jun. 19 - Wed.)

- **5–7 Homework Assignments: 30%**
 - Programming assignments in Scala (submission in **Blackboard**)
 - You can utilize or refer to any other materials (e.g., ChatGPT), but you **MUST** write your **OWN** solution.
 - **Cheating is strictly prohibited. Cheating will get you an F.**

- **5–7 Homework Assignments: 30%**
 - Programming assignments in Scala (submission in **Blackboard**)
 - You can utilize or refer to any other materials (e.g., ChatGPT), but you **MUST** write your **OWN** solution.
 - **Cheating is strictly prohibited. Cheating will get you an F.**

- **Midterm exam: 30%**
 - April 24 (Wed.) 13:30 – 14:45 (in class, 75 min.)

- What is the *mathematical model* of computers?

- What is the *mathematical model* of computers?

Turing Machine!

Let's learn **Turing Machine**

- What is the *mathematical model* of computers?

Turing Machine!

Let's learn **Turing Machine**

- Is it possible to solve *every problem* using computers?

- What is the *mathematical model* of computers?

Turing Machine!

Let's learn **Turing Machine**

- Is it possible to solve *every problem* using computers?

No!

Let's learn **Undecidability** and **Intractability**

A Turing machine is a specific kind of **automaton**.

- **Part 1: Finite Automata (FA)**

- Regular Expressions (REs)
- Regular Languages (RLs)
- Applications: text search, etc.

- **Part 2: Pushdown Automata (PDA)**

- Context-Free Grammars (CFGs)
- Context-Free Languages (CFLs)
- Applications: programming languages, natural language processing, etc.

- **Part 3: Turing Machines (TMs)**

- Lambda Calculus (LC)
- Recursively Enumerable Languages (REs)
- Undecidability and Intractability

Roadmap: Towards Turing Machine

	Automata	Grammars	Languages
(Part 3) Turing Machines	(Lecture 23) $\text{ETM} \rightleftharpoons$ (Lecture 21/22) $\text{TM} \rightleftharpoons$ (Lecture 24) LC		(Lecture 21) REL (Lecture 26) $\text{DL} \supset \text{NP} \stackrel{?}{=} \text{P}$ \cup (Lecture 25) \supset
(Part 2) Pushdown Automata	(Lecture 14/15) $\text{PDA}_{\text{FS}} \rightleftharpoons \text{PDA}_{\text{ES}}$ \cup $\text{DPDA}_{\text{FS}} \supset \text{DPDA}_{\text{ES}}$ \cup (Lecture 17) $\not\subseteq$	(Lecture 16) \rightleftharpoons (Lecture 11/12) CFG \vdots Chomsky Normal Form (Lecture 18)	(Lecture 11) CFL (Lecture 13) Parse Trees & Ambiguity \vdots Closure Properties (Lecture 19) Pumping Lemma (Lecture 20)
(Part 1) Finite Automata	(Lecture 4) $\text{NFA} \rightleftharpoons$ (Lecture 3) $\text{DFA} \rightleftharpoons$ (Lecture 5) $\epsilon\text{-NFA} \rightleftharpoons$ (Lecture 7) RE (Lecture 6) Equivalence & Minimization (Lecture 10)		(Lecture 3) RL \vdots Closure Properties (Lecture 8) Pumping Lemma (Lecture 9)
(Part 0) Basic Concepts	(Lecture 1) Mathematical Preliminaries	(Lecture 2) Scala	

A Turing machine is a specific kind of **automaton**.

A Turing machine is a specific kind of **automaton**.

Then, what is an **automaton**?

A Turing machine is a specific kind of **automaton**.

Then, what is an **automaton**?

For example,

A Turing machine is a specific kind of **automaton**.

Then, what is an **automaton**?

For example,

Introduction of Automata

A Turing machine is a specific kind of **automaton**.

Then, what is an **automaton**?

For example,

Theorem

The current state is OFF if and only if the button is pushed even times.

Theorem

The current state is OFF if and only if the button is pushed even times.

- Is it possible to prove it?

Theorem

The current state is OFF if and only if the button is pushed even times.

- Is it possible to prove it?

Let's learn **mathematical background and notation**.

Theorem

The current state is OFF if and only if the button is pushed even times.

- Is it possible to prove it?

Let's learn **mathematical background and notation**.

- Is it possible to implement the automaton?

Theorem

The current state is OFF if and only if the button is pushed even times.

- Is it possible to prove it?

Let's learn **mathematical background and notation**.

- Is it possible to implement the automaton?

Let's learn **Scala** as an implementation language.

- Mathematical Preliminaries
