

Lecture 27 – Course Review

COSE215: Theory of Computation

Jihyeok Park

2026 Spring

- What is the *mathematical model* of computers?

- What is the *mathematical model* of computers?

Turing Machine!

Let's learn **Turing Machine**

- What is the *mathematical model* of computers?

Turing Machine!

Let's learn **Turing Machine**

- Is it possible to solve *every problem* using computers?

- What is the *mathematical model* of computers?

Turing Machine!

Let's learn **Turing Machine**

- Is it possible to solve *every problem* using computers?

No!

Let's learn **Undecidability** and **Intractability**

- **Part 1: Finite Automata (FA)**
 - Regular Expressions (REs)
 - Regular Languages (RLs)
 - Applications: text search, etc.
- **Part 2: Pushdown Automata (PDA)**
 - Context-Free Grammars (CFGs)
 - Context-Free Languages (CFLs)
 - Applications: programming languages, natural language processing, etc.
- **Part 3: Turing Machines (TMs)**
 - Lambda Calculus (LC)
 - Recursively Enumerable Languages (REs)
 - Undecidability and Intractability

	Automata	Grammars	Languages

- The final exam will be given in class.
- **Date:** 13:30-14:45 (1 hour 15 minutes), June 17 (Wed.).
- **Location:**
 - **IT-Education Hall B102:** Students with Student ID 2025XXXX
 - **IT-Education Hall 611:** All other students
- **Coverage:** Lectures 14 – 26
- **Format:** 7–9 questions with closed book and closed notes
 - Yes/No questions about concepts in the theory of computation.
 - Construction of automata or grammars for given languages.
 - Proofs of given statements related to automata or grammars.
 - etc.
- Note that there is **no class** on **June 22 (Mon.)**.
- Please refer to the **previous exams** in the course website:

<https://plrg.korea.ac.kr/courses/cose215/>

- I hope you enjoyed the class!
